# Fire Safety Message

Plan what to do when you check in. You won't have time to plan during a fire.

**First, find two exits** nearest your room. Fire exit stairwells are located on all floors.

Then count doors between your room and exits so you'll have a reference point if smoke obstructs your view.

### When you hear an alarm, act, don't investigate.

If fire is in your room, get out and close the door. Once out, report the fire.

**If fire is not in your room**, leave if you can. First, feel your door. If it's cool, open it slowly and go to the nearest exit. Crawl in smoke. Fresh air will be at the floor. Take your key so you can go back if you can't use your exits.

Never use elevators during a fire. They could stop at the fire floor.

**If your room door is hot**, don't open it. Your room may be the safest place to be. Seal all cracks with wet towels. Shut off fans and air conditioners. Signal at your window.
